MEMORANDUM FOR: Project Contracting Officer 23 October 1956
THROUGH : Deputy Project Director
SUBJECT : IMC Systems

Following our conversation of this date I understand that Baird is preparing a proposal for a modified drift-sight and that this proposal will specify both cost and delivery time. I further understand it to be our preliminary decision that we will buy at least enough drift-sight modifications to equip all aircraft likely to carry the C camera--this decision contingent on cost and delivery dates being reasonable. I am still of the view that we may wish to make this modification on all drift-sights. I hope no time will be lost in getting Baird to work on a prototype unless the cost seems to be way out of line.
